An on-site inspection was denied on October 2, 1980 by Steve Farry, plant manager. Mr. Farry was advised by Lee Barron of Union Carbides' legal department. Mr. Farry advised us that any future visits must be made in writing in advance. The letter should include what, if any, documents we want to see and to justify the need to see it.

An off-site inspection was non-productive due to local obstructive physical features.
